react-burger-menu `build` `passing`

An off-canvas sidebar React component with a collection of effects and styles using CSS transitions and SVG path animations.

Using Redux? Check out [redux-burger-menu](#) *for easy integration of react-burger-menu into your project.*

Demo & examples

Live demo: [negomi.github.io/react-burger-menu](#)

To build the examples locally, run:

```
npm install
npm start
```

Then open `localhost:8000` in a browser.

Tests

The test suite uses [Mocha](#), [Chai](#) and [Sinon](#), with [jsdom](#).

You will need at least Node v4.0.0 (or [io.js](#)*) to run the tests, due to jsdom depending on it.*

To run the tests once, run:

Need

Sticky

Make sure that an element is always visible. | ui-component | | navigation |

> The W3C added a specification for `position: sticky` which is great but

The library doesn't need to be a polyfill and doesn't need to comply to
because the element should scroll along the rest of the content and sh
"position: fixed". See the W3C `position: sticky` for more information.

Are there libraries that help make a React element sticky?
